#### INTRODUCING THE SLIPRES COVER

The newly formulated SlipRes Cover is the highest performing cover we've ever produced on a golf ball. It has the highest friction coefficient rating possible, to achieve the impossible: maximum greenside spin without losing any spin from the rough AND reduced spin off the driver. Our new SlipRes cover offers the best of both worlds: better control and feel, longer straighter shots. Guaranteed.

DELTA WING Dimple Technology

#### Engineered for STRAIGHT DISTANCE

The construction of the e6 SPEED is combined with the new Delta Dimple. Designed to allow smoother air resistance around the ball and to resist pop ups, the Delta Dimple is designed for straight distance.

# "THE BALL IS #1. THE MOST IMPORTANT ITEM IN THE BAG IS THE BALL."
